

Transportation Asset Management Council
Monthly Report

April 2006

- Staff continued to review the PASER condition data collected in 2005. Presentation of the analysis will be given at the May 3 Council meeting.
- Training was completed to the MPOs and regional planning agencies and to the local road agencies on the investment reporting tool. Thirteen sessions were held with 367 attendees. This translated into 272 agencies or 44% of the total number of agencies. A breakdown of the agencies included 166 cities/villages, 69 road commissions, 19 MPO/RPO, 3 from MDOT, 4 consultants, and 1 township.
- The training guide and asset management course materials were approved. The guide is on the web site and we have had 150 copies of the guide and participant's workbook printed for the upcoming training sessions.
- Work continued on the planning for the first annual Michigan Asset Management Conference to be held May 10, 2006, at the Kellogg Center on the campus of Michigan State University.
- The Model Analysis Team did not meet in April. Rather the members were working on different data collection efforts. The letter and survey regarding the "born-on" dates (date of last construction) have gone out and data is being submitted. The data is supposed to be reported by May 15.
- Plans were finalized for the Council session on updating the work plan, scheduled for June 1. The format will be for each member to be given a copy of the updated work plan (to be sent by email to members). Each member will be asked to review each section with an eye toward keeping it as is, modifying it, deleting it or adding a completely new activity.
